ABOUT ME

A goal-oriented Entry Level Frontend Developer with knowledge of HTML, CSS, JavaScript and React, seeking to use technical proficiency and creativity to develop engaging user experiences and advance in a professional career. Looking to leverage effective debugging, code optimization and project collaboration capabilities to produce applications that exceed user expectations.

PREVIOUS EXPERIENCE

React Star Wars Cards

Card site development using react

- Creation of the site based on the free SWAPI API
- Manage API responses to display information and send API calls to request it
- Using React useState, React slick, React useContext and React Router
- Styled using only vanilla css

The code for this project can be seen on my GitHub

React Ecommerce

Ecommerce site development using react

- Creation of the site based on my own DB in Mongo DB.
- Manage API responses to display information and send API calls to request it
- Using React useState, React slick, React useContext and React Router
- Animated and responsive site
- Styled using only vanilla css

The code for this project can be seen on my GitHub
